

Steps for Setting Up Stations for a Moose Legion Meeting or Conferral

- After Altar is set, measure 12 feet from the center of the Altar to the center of the front edge of the President's station.
- Along the line between the Altar and the President's station, mark a point 5 feet from the center of the Altar, and another point 9 feet from the center of the Altar (shown by dots above).
- Position the stations for Charity and Loyalty so that the outside corners of the station are on an imaginary line through the mark at 9 feet (shown by dotted line above). Do the same thing with the stations for Faith and Hope using an imaginary line through the mark at 5 feet.
- Once corners are set, measure 12 feet from the center of the Altar to the center of the front edge of each station. If necessary to get the proper measurement, slide the station away from the Altar (keeping the corner on the imaginary line), and pivot the station until proper distance is achieved.
